

Lawrence Creek

Monitoring Years: 2006-2008

Current Impairments: None

Interesting Facts about Lawrence Creek:

- Collects water from a small watershed
- Much of the Creek is groundwater fed
- Transparency tube readings are almost always over 100 cm (very clear)
- This is the only designated trout stream in Chisago County that currently has trout living in the stream
- The temperature of the stream rarely reaches 55 degrees F (10+ degrees lower than other streams)
