

Renewable Energy

Energy comes from many types of resources. These resources include non-renewable (oil, gas, coal) and renewable (wind, solar, biomass). To do your part to reduce our dependency on foreign resources and non-renewable resources read below...

Check with your local power company to purchase 100% green or renewable energy. There are different types of renewable energy available for purchase. By purchasing just 2 blocks of wind energy per month for a year you will save energy equivalent to driving your car 6,000 miles or planting an acre of trees. (East Central Energy)

North Branch Municipal Water and Light

- 🌐 <http://www.ci.north-branch.mn.us>
- 🌐 Call 651/674-7100 for more information on purchasing 100% renewable energy

Southern Minnesota Municipal Power Agency

- 🌐 Learn about the company where NB Water and Light purchases their power
