

## Rock Creek

Monitoring Years: 2007-2008

Current Impairments: Fish Bioassessments, Macroinvertebrate Bioassessments

Interesting Facts about Rock Creek:

- Most of the watershed is located in Pine County
- Starts in Rock Lake
- The water contains a lot of Tanin – tannin is found in the organic compounds of leaves and bark. This turns the water tea-colored
- Transparency tube readings are generally high (clear water) unless there is a major runoff event
